Introductory Discovery Flight Package

Since this is a real flight lesson in a real airplane, the "pilot-to-be" will need a real Pilot Logbook, which we also include!

We offer the most comprehensive Discovery Flight Package available today. "The Reach for the Sky!" CD is written and produced by Pilot Journey and is not available ANYWHERE else.

Remember, this is a real flight in an airplane. The person this gift is for will be doing MOST of the flying in the pilot's seat and actually do a real flight lesson.

Have a question? Call us at (888) 696-2390 Monday-Friday 9am-4pm CST.

Imagine a gift that inspires; could change a life; and be a motivator to set new goals. This is 2009's "WOW" gift idea for yourself or for that special someone in your life. Give an "experience" that has true meaning.

Then after the flight, you or your flight school will request a Certificate of Accomplishment that will make a great conversation piece for any wall!

In a hurry? Pressed for time? Need a gift ASAP? No problem.

ORDER ONLINE – RECEIVE AN INSTANT GIFT CERTIFICATE! We send everyone a copy of the Discovery Flight Certificate instantly as a PDF attached to your receipt in case you need your certificate in a hurry or would like to see it before we print it. PLUS, we send our own custom certificate that you may give along with all the other items that make up your Discovery Flight Package. A real value from the #1 seller of introductory flight lessons.

Don't take our word for how great this gift is....read what others have said in testimonials on page 9.

Your Discovery Flight Package will be sent via US MAIL, in addition to the copy of the certificate that you instantly receive in your email along with your receipt. This enables you to put the pdf version of the certificate in a card if you are pressed for a quick gift, or it can be used right away to schedule the Discovery Flight with the participating flight school.

The Details

A Real Flight Lesson

This is not a “ride”, but a real flight lesson in a real FAA Certified airplane with an FAA Certified Flight Instructor. The person with this certificate will sit in the pilot’s seat and actually learn to fly. They will have their hands on the controls and experience what flying an airplane is all about. More importantly, they will learn that flying is easier to learn than most people could imagine. The air portion of your flight lesson will last from 30 to 40 minutes.

Reach For the Sky CD

This exclusive CD was written and produced by the pilots here at Pilot Journey. It contains the following items: Learn to fly Seminar – This PowerPoint seminar was given to live audiences and now is captured on CD. Some of the topics covered include:

- Why is flight training life changing
- What to know before you start learning how to fly
- How to succeed after you start
- How to save money on your training
- The difference between part “141” and part “61” flight schools
- Mistakes to avoid
- What can you do with your pilot’s certificate

Career Pilot Seminar – Thinking about a career as a pilot? This 30 minute seminar shares some valuable insights and includes:

- Career Options
- What is required
- All about medical certificates
- The training vs., income timeline
- Are there any short cuts? Yes!
- What is the best school?

25 page eBook that shares with you what to expect on flight.

Your first flight lesson will be so exciting that we found it helpful to share with you what exactly you will be doing on the flight before you actually get in the airplane. Some things in life simply need an “introduction” so you can get every single possible benefit out of the experience. Your first flight lesson is no exception. By taking just 15 minutes to read about your flight, we guarantee you will enjoy your first flight even more.

Introductory Discovery Flight Package

Two real ground school lessons from a complete private Pilot Course.

Learning how to fly an airplane consists of two types of lessons: Lessons on the ground and lessons in the air. Lessons on the ground are normally done in the comfort of your own home, while of course lessons in the air are done in a real airplane. Studies have shown that students ALWAYS do better when they watch a video and read just a little before they actually go on the lesson in the air. We at Pilot Journey strongly suggest that you take the time to watch a real ground lesson on your computer screen before you actually go fly the airplane. Doing so will ensure you get the most benefit of your lesson in the air.

Certificate of Accomplishment

Doing something this much fun and memorable would not be complete without something to hang on the wall to show family and friends. We include a special link on our website where you can obtain your certificate which we can custom print and send to you in the mail following your flight.

Subscription to AOPA Flight Training Magazine

The Aircraft Owners & Pilots Association official "learn to fly" publication is Flight Training Magazine. A 6 month subscription is yours free and we take care of all the details in having this delivered to you at no charge. You will continue to learn more about flying as you read the pages of this well respected industry publication.

Two Official FAA Publications on CD

We just started sending this CD in July 2009 because the information contained is so helpful in getting the most out of your real flight lesson. These FAA official handbooks, Airplane Flying Handbook (previously titled Flight Training Handbook) and Pilot's Handbook of Aeronautical Knowledge, have been required reading for all pilots for more than 30 years.

Here's more information about these well known publications.

Airplane Flying Handbook

The Airplane Flying Handbook introduces the basic pilot skills and knowledge essential for piloting airplanes. It benefits student pilots just beginning their aviation endeavors, as well as those wishing to improve their flying proficiency and aeronautical knowledge, those preparing for additional certificates or ratings, and flight instructors engaged in the instruction of both students and licensed pilots.

This book is the official FAA source for learning to fly; many test questions for the FAA Knowledge Exams come from this reference. It is illustrated throughout with full-color graphics and photography. Indexed, 8.25"x10.75" format, 280 pages.

Pilots Handbook of Aeronautical Knowledge

The Pilot's Handbook of Aeronautical Knowledge is essential reading for all pilots—from beginning student pilots to those pursuing more advanced pilot certificates. This official FAA handbook introduces pilots to the broad spectrum of knowledge needed as they progress through pilot training. Studying this book, pilots gain the required knowledge to earn a certificate and learn the aerodynamic theory associated with airplane flight. This 2008 edition reflects the latest aviation industry procedures, equipment, techniques and regulations. It is a key reference for all the information necessary to operate an aircraft and for passing the FAA Knowledge Exam and Practical Test (checkride). Newly illustrated with hundreds of full-color drawings and photographs! 8.25"x10.75", 470 pages.

Frequently Asked Questions

1. How old does the person using this certificate need to be?
 - a. They need to be 16 years old. If they are younger than 16, please contact the flight school first to ask if they will accept the certificate.
2. How are refunds handled?
 - a. The certificate is valid for 1 year. It may be used or returned without question during that time. After one year it may be returned at our discretion. If the certificate was purchased using a credit card, we are only allowed to credit the card for 120 days after purchase. Refunds made after that time will be made via check.
3. Can someone ride along on the flight?
 - a. This depends on what type of airplane is being used. Some schools use 4 seat airplanes and some use 2 seat airplanes. You will need to contact the local school to see if this is possible.
4. What about weight requirements/issues?
 - a. For the most part anyone less than 240 lbs can fly in all planes with all of our participating flight schools. Many locations have larger airplanes that allow an increase in weight. If you have questions about weight limitations or possible health issues that might prevent you or someone else from taking this flight please contact us first. We are very experienced with such matters.
5. What about eye-site?
 - a. There are not any restrictions on the use of glasses or contacts in being a pilot unlike what you may have heard on TV.
6. What about the weather?
 - a. We suggest flying on days when it's not too windy and not too hot. Hot air creates more turbulence and makes for a bumpy ride. For instance, the summer mornings are generally better than afternoons. Your flight school will work with you to make sure the weather is just right for your first flight lesson. Don't be surprised if you schedule and the school calls to move the lesson to another day. The weather may seem perfect on the ground, but at 3,000 feet it may not be. Your flight school wants your flight to be smooth and take place on days when you can see the sites from the airplane.
